Alphabet Game

Find objects around you that start with each letter of the alphabet and cross off the coordinating letters on this sheet until you've found them all.

To make the game harder, try to find objects within a specific category. For example – look for street names, cities, types of cars, etc. that start with each letter of the alphabet.

BATTLESHIP

How to Play:

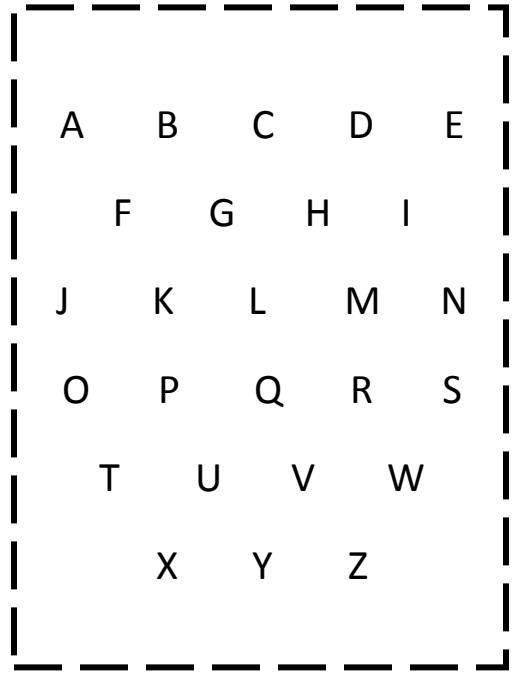

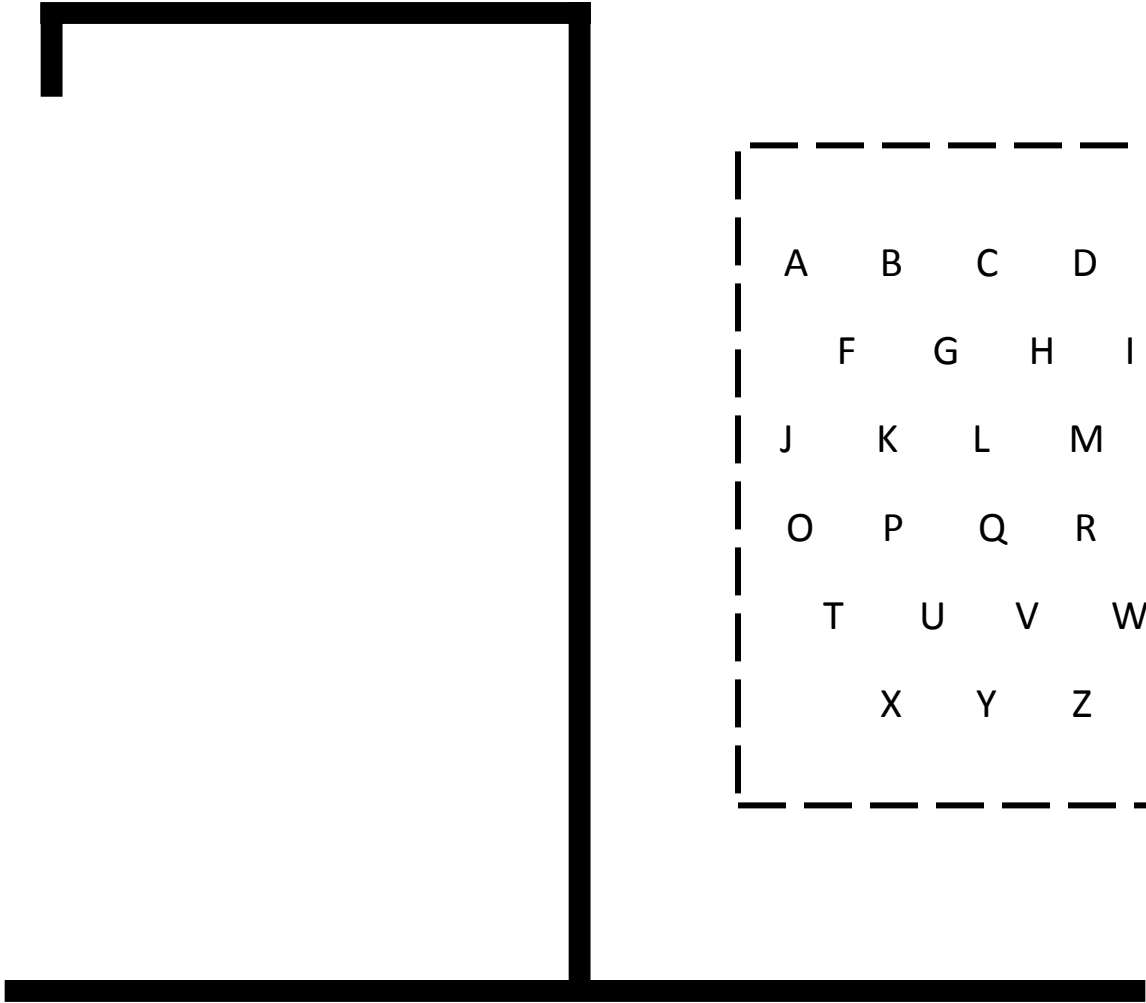

Set up your Battlefield by coloring in the squares where you want your ships to be, according to the ship reference – for example for the Destroyer, color in 2 squares.

Once both of the players have set up their battlefields, take turns firing upon your Opponent's Battlefield by calling out plot points - for example: A-5.

Mark your shots with a (X) for a hit or a (O) for a miss on your Opponent's Battlefield grid according to their reply. When your opponent fires upon you, answer hit or miss, according to their shot. Mark your hit ships with an X on your battlefield grid. Once all of your ships squares have been hit, that ship has sunk.

The player who sinks all of their opponent's ships first wins.

Lines and Dots

How to Play:

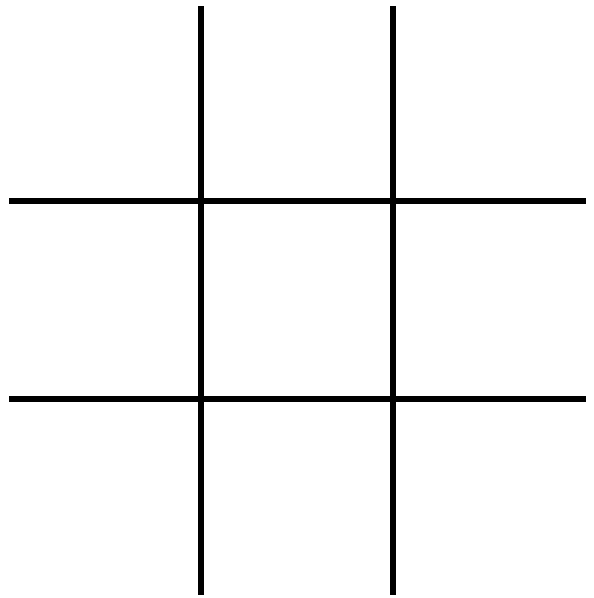

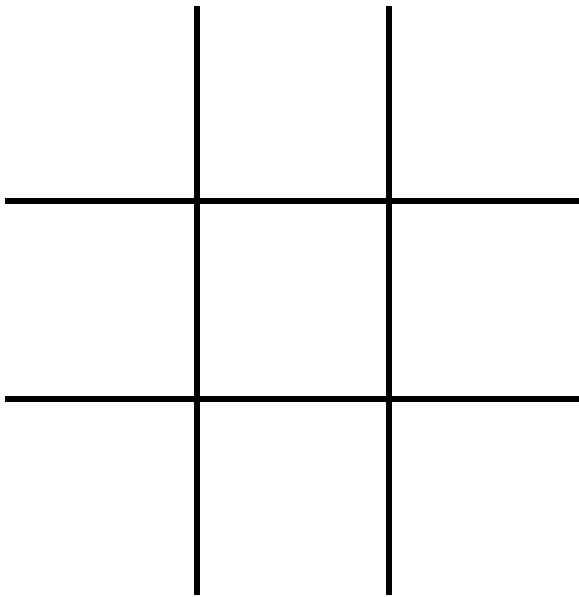

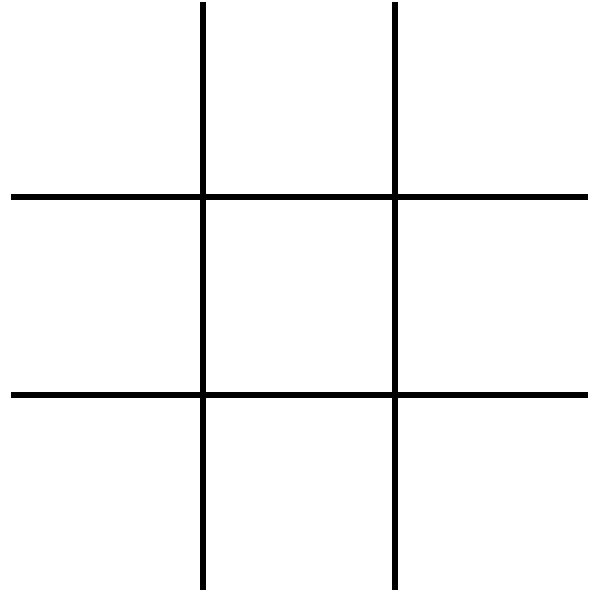

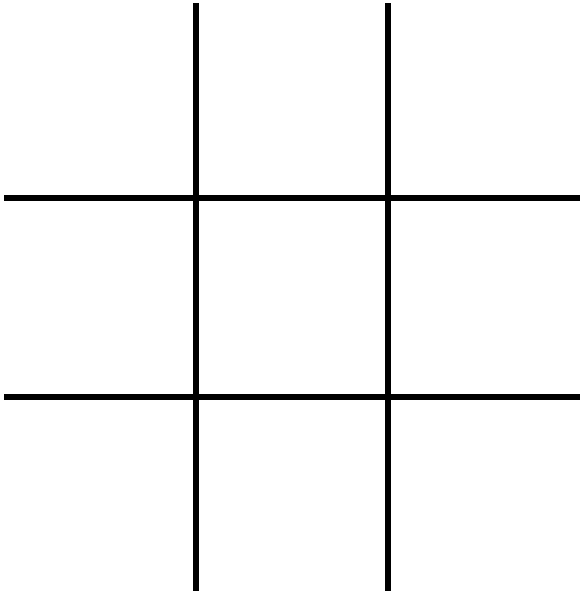

This game can be played with 2 or more players. Each player takes turns drawing horizontal or vertical lines between the dots, connecting them together.

If you complete a full square, write your initial inside the box and take another turn. If your line creates two boxes, then you get to put your initial in both of them.

Continue playing until all the dots on the page are connected. The player who has completed the most boxes wins.
